Japanese alignment test set (ja_JP) — answer key

Test file: `output/json/ja_JP.json` · audio: `output/wav/ja_0001.wav … ja_0025.wav` (16 kHz mono). Keep this document away from whoever inspects the files.

25 files · **18** clean · **7** with planted errors (30 errors in total) · **5** synthetic voice · **20** human-sounding voice

- **Human-sounding**: breathing, sighs and uneven pauses, like a person speaking.
- **Synthetic**: robotic — no breathing or sighs, exactly the same 0.16 s silence between every word.

Error types

- **Boundary shift**: start or end moved before the word starts, into its middle, or past its end (13)
- **Cut-off word**: end placed in the middle of the word, so the word is cut off (4)
- **Incorrect transcription**: the word is spoken, but the transcript says a different word (6)
- **Missing segment**: the word is spoken, but there is no segment and it is not in the transcript (4)
- **Hallucinated segment**: a segment and transcript word for something never spoken (placed in a pause) (3)

All files

File	Voice type	Status	Planted errors	Duration (s)	Voice
ja_0001.wav	human	Clean	—	3.68	Kyoko - Warm, Clear and Natural
